DATALOCKER® DL3/DL3FE

SafeConsole Setup Guide

DL3 device firmware must be updated to version 2.21 or higher. For firmware updates go to https://datalocker.com/device-updates

1 Connect device using the Administrator password (default password is 0000000).

2 Enter the "SETUP" menu, tap "SAFECONSOLE" from the SETUP menu, then tap "ENABLE".

3 Return to the SETUP menu and go into "USER PASSWORD". Tap "CREATE PASSWORD" button. (This will require you to change the current Administrator password)

4 Tap "CHANGE PASSWORD" and set a new Administrator password. Please save password in a secure location as you cannot recover passwords with SafeConsole.

5 Back out of the "SETUP" menu and disconnect the DL3 drive from the computer.

6 Connect device using the User password (default password is 0000000).

7 Once you have logged on as the User, the DL3 device will auto connect to the computer and you will get the "SafeConsole Waiting..." message on the screen.

8 After a few seconds, Windows will display an AutoPlay window, click run "DataLockerDL3" and the SafeConsoleReady app will open.

✓ At the SafeConsole Connection Token URL screen, enter your connection URL to register this DL3 to your SafeConsole server.
